Geography Of Elections

Electoral geography is the analysis of the methods, the behavior, and the results of elections in the context of geographic space and using geographical techniques. Specifically, it is an examination of the dual interaction in which geographical traits of a territory affect the political decisions, and the geographical structure of the election system affects electoral results. The purpose of the analysis is to identify and understand driving factors and the electoral characteristics of territor

How Geography Affected Voting Behavior in the 2016 Presidential Election. Geography is often assumed to play a large role in how Americans vote. In the 2016 election, rural Americans voted overwhelmingly for Donald Trump, while urban Americans sided with Hillary Clinton. I hypothesize that in addition to this urban/rural dichotomy, other continuous geograph- ic variables may affect voting behavior, such as:
